

Dr. Leslie Ortner studied medicine at the University of Buenos Aires, obtaining a medical degree in 1982. Initially, he trained in Gynecology and Obstetrics and General Surgery practices.

In 1989 Dr. Ortner was attracted by the constant advancement of technology applied to Aesthetic Medicine. Thus begins an important process of specialization in Non-invasive Aesthetic Medicine and Laser Therapy that leads him to participate in National and International Congresses and then found what is now one of the most important Aesthetic Medicine Centers in the country. His training in Aesthetic Medicine continues to this day, as he realizes that it is an area in constant evolution and growth.

Based on this development, Dr. Ortner, always attentive to incorporating the latest techniques in non-surgical Aesthetic Medicine, continues to attend the most recognized specialized Congresses in the area of Aesthetic Medicine. He also specializes in obesity, eating disorders, phlebology and lymphology, achieving a complete integration of Aesthetic Medicine in general, always associated with health.
